

NORTHERN PART OF JIM HOGG COUNTY, TEXAS

Introduction

By

Walter N. White
Senior Hydraulic Engineer

This release contains records of wells in the northern part of Jim Hogg County, and is illustrated by a map on which the wells listed are shown, each well being given a number on the map corresponding to the number assigned to it in the well tables. The records were obtained during the summer of 1934 by James C. Cumley, under an allocation of funds by the Federal Emergency Administration of Public Works, as a part of a state-wide program of ground-water investigations by the Texas Board of Water Engineers in cooperation with the United States Department of the Interior, Geological Survey.

Altogether 92 wells fairly well distributed through the northern part of the county are described in the tables. The records include the following: name of well owner and driller; size and depth of well; position and thickness of chief water-bearing beds in a few of the wells; character of pumping equipment; depth to water in a part of the wells; use made of the water; the mineral character of the water as shown by field tests for hardness, chloride and bicarbonate; and more complete laboratory analyses of water from selected wells.

Most of the wells recorded in the county are used for domestic purposes or stock, or both. A few wells at Hebbronville are used for industrial purposes and railroad supply.

The records given in this release serve as a guide to land owners and others who need information regarding wells in different parts of the area, and the quantity and quality of water yielded by the wells.

The publication was mimeographed by employees of the Work Projects Administration, Project No. 10443.

Records of wells in northern part of Jim Hogg County, Texas

| No. | Distance from Hebbronville | Owner | Driller | Date completed | Depth of well (ft.) | Diameter of well (in.) | Water-bearing bed | |

| 359 | - | - | W | S | 700 | 550 | 200 | Azucar well. |
| 360 | - | - | W | S | 650 | 600 | 20 | Chorita well. Reported to flow 60 gallons a minute in 1917. Casing; 587 feet of 6 5/8-inch and 766 feet of 5 3/16-inch. |
| 371 | - | - | W | D,S | 600 | 400 | 100 | North Sordo Viejo well. |
| 372 | - | - | W | D,S | 500 | 430 | 40 | South Sordo Viejo well. |
| 373 | - | - | W | D,S | 220 | 150 | 50 | Chancaca well. |
| 374 | - | - | - | N | - | - | - | Weak well, now abandoned. |
| 375 | - | - | W | S | 390 | 270 | 70 | Todo fiero well. |
| 376 | - | - | - | N | - | - | - | Weak well now abandoned. |
| 377 | - | - | W | S | 600 | 600 | 70 | Chatersciosa well. |
| 378 | - | - | W | S | - | - | - | Dripping Vats well. |
| 379 | - | - | W | S | 1,100 | 850 | 90 | San Pedro well. |
| 380 | - | - | W | S | 800 | 650 | 90 | Coyote well. |
| 381 | - | - | W | S | 2,500 | 2,200 | 90 | Agua Amargo well. |
| 382 | - | - | W | S | 750 | 1,000 | 100 | Chapote well. |
| 401 | - | - | W | D,S | - | 900 | - | North well at Josefina (Jesus Maria) ranch. |
| 402 | 52.2 | Mar. 23, 1934 | W | D,S | - | 50 | - | Dug well. |
| | - | - | - | N | - | - | - | Drilled well in bottom of dug well but has caved and is not used now. |

d/ Sulphate test by turbidity method and may be as much as 25 per cent in error.

e/ For analysis of water see under well number in table pp. 14-15.

f/ Reported by driller.

Table of Drillers' Logs, northern part of Jim Hogg County, Texas
