Aug. 2, 1936.

WILSON COUNTY, TEXAS

\* \* \*

Introduction  
by  
Samuel F. Turner  
Associate Hydraulic Engineer  
U. S. Geological Survey

The purpose of this survey was to obtain information concerning existing wells and springs and the quantity and quality of water they yield, and put down test holes where additional information was needed.

This project was part of a statewide Works Progress Administration project known as a "Statewide Inventory of Water Wells," sponsored by the State Board of Water Engineers. The Division of Ground Water of the U. S. Geological Survey cooperated in the technical direction of the project and the Bureau of Industrial Chemistry of The University of Texas furnished laboratory space and equipment and supervised the chemical analyses.

The analyses were made by chemists employed on Works Progress Administration Project 6507-5112 at Austin, Texas, sponsored by the State Board of Water Engineers. This release was typed and assembled by typists and draftsmen employed on this project.

The field work in Wilson County was started on December 26, 1935, and completed on October 1, 1936. This work was done as Project 2083 of District 10 of the Works Progress Administration, San Antonio, Texas. E. L. Marek, an Engineer was project superintendent. Mr. Marek should be given credit for his great interest in the work and for the many extra hours he spent on the project. The office of the Works Progress Administration in the San Antonio District made this work possible by their constant help and cooperation.

This release contains the well and spring records and well logs obtained by the project superintendent, logs of the test holes drilled by the W. P. A. labor, and the chemical analyses of water from privately owned wells and springs. Locations of all wells and springs listed are shown on the folded map in the back of the release.

The test wells were drilled by W. P. A. labor using a soil auger, drop auger, churn drill, and a sand bucket. Samples were collected at one foot intervals by the well driller in charge of the party. The project superintendent studied these samples and compiled the logs.

Records of wells and springs in Wilson County, Texas

(All wells are bored or drilled unless otherwise noted in "Remarks" column.)

No.	Distance from Lavernia	Survey	Owner	Date completed	Depth of well (ft.)	Diameter of well (in.)	Height of measuring point above ground (ft.) a/

Logs of test wells drilled by W. P. A. labor in Wilson County, Texas  
 (Samples examined and classified by E. L. Marek, Project Superintendent.)

## Well 3

Edge of valley, on side of old San Antonio road, Francisco Herrera Survey,  $1\frac{1}{2}$  miles west of Lavernia.

	Thickness (feet)	Depth (feet)
Yellow sandy loam	3	3
Black sandy loam	2	5
Brown gumbo	1	6
Red sandy clay	3	9
Blue clay	3	12
Yellow clay	2	14
Yellow sandy clay	1	15
Blue clay	3	18
Blue and yellow clay	3	21
Brown clay	3	24
Blue shale	2	26
Blue sand and shale	4	30
Brown clay	2	32
Gray water sand	3	35
Red sand rock	1	36
Red sand rock		36
Struck water at 26 feet.		
Water level, $24\frac{1}{2}$ feet below top of ground.		
6 hours after hole completed.		
Water sample collected. Aug. 14, 1936.		

## Well 5

Swamp, on side of county road, Francisco Herrera Survey,  $1\frac{1}{2}$  miles west of Lavernia.

Black sand	2	3
Dark yellow clay	1	3
Black sand	2	5
Brown clay	3	8
Yellow clay	2	10
Dark yellow sand	2	12
Light yellow sand	4	16
Brown sand	3	19
Red sand	1	20
Yellow sand	3	25
White sand	1	26
Dark yellow sand	1	27
White and red sand	1	28
Yellow sand		29
No water sample collected.		
April 24, 1936.		

## Well 11

Rolling prairie, on side of U. S. Highway 87, Juan Dolgado Survey, 2 miles southeast of Lavernia.

White sand	5	5
Yellow silty sand and gravel	3	8
Brown and white sand rock	1	9
Light brown rock	1	10
Light brown rock		10
No water sample collected.		
April 24, 1936.		

## Well 17

Sloping hillside, on side of county road, Manuel Kimenias Survey,  $2\frac{3}{4}$  miles east of Lavernia.

	Thickness (feet)	Depth (feet)
Surface soil	2	2
Dark sandy loam	1	3
Yellow sand	1	4
Yellow sandy clay	1	5
Yellow clay	1	6
Red and yellow clay	1	7
Red sandy clay	1	8
Gravel		8
No water sample collected.		
Aug. 14, 1936.		

## Well 20

Sloping hillside, near center of H. C. Pace 100 acre tract, J. T. D. Wilson Survey,  $4\frac{1}{2}$  miles east of Lavernia.

Leached sand	3	3
Red and yellow clay	2	5
Red clay and sand	6	11
Yellow clay and sand	$\frac{1}{2}$	$11\frac{1}{2}$
Struck water at $11\frac{1}{2}$ feet.		
No water sample collected.		
Jan. 7, 1936.		

## Well 25

Rolling prairie, on side of State Highway 27, Jose Maria Balmaseba Survey,  $2\frac{1}{2}$  miles northeast of Lavernia.

White sand and gravel	2	2
Yellow clay, sand and gravel	4	6
Yellow sand	1	7
Light yellow clay	1	8
Gravel bed		8
No water sample collected.		
April 24, 1936.		

## Well 26

Level land, on side of road to Seguin, south center of Mrs. Ola Chaney 364 acre tract, Felipe Flua Survey,  $1\frac{1}{2}$  miles north of Sutherland Springs.

Coarse yellow sand	3	3
Red and yellow clay	3	6
Brown sand rock	2	8
Coarse yellow sandy clay	9	17
Red sandy clay	2	19
Coarse red sand and gravel	2	21
Blue clay	3	24
Red medium sand	5	29
Yellow medium sand	3	32
Coarse red sand	3	35
Coarse sand and gravel	2	37
No water sample collected.		
Aug. 12, 1936.		

## Logs of test wells in Wilson County--Continued

## Well 36

River bottoms, on side of county road in Southerland Springs.

	Thickness (feet)	Depth (feet)
Black loam	1	4
Gray sandy loam	1	5
Brown sandy clay	1	5
Red clay	3	6
Brown clay	1	7
Dark sandy clay	2	8
Stiff yellow clay	2	11
Stiff white clay	1	12
Fine gray sand with black gravel	3	18
Struck water at 11 feet.		
Water level, 9.2 feet below top of ground, 1 hour after hole completed.		
Water sample collected.		
June 26, 1936.		

## Well 4C

Creek bottoms, on side of county road, A. Trevino Survey, 1½ miles east of Southerland Springs.		
White sand	7	7
White and yellow sand	2	9
Red clay	7	10
White and yellow clay	4	10
Red clay	1	21
Soapstone	13	34
Struck water at 28 feet.		
No water sample collected.		
June 27, 1936.		

## Well 41

Ridge top, on side of county road, W. E. Colter tract, A. Trevino Survey, 3 miles southeast of Southerland Springs.		
Yellow sand	4	4
Yellow and red clay	3	6
White sandy clay	1	7
White sand	1	8
Caliche and brown sandy clay	2	10
Yellow sandy caliche	6	10
Caliche	3	19
Gravel and sand	1	20
No water sample collected.		
Aug. 7, 1936.		

## Well 47

Slope, on side of county road, C. R. Currie tract, Norricio Rodriguez Survey, 3 miles southwest of Southerland Springs.		
Red clay and sand	8	2
Dark yellow clay	3	5
Light yellow sand	4	9
Yellow sand	3	10
Yellow silty sand	1	11

## Well 17--Continued

	Thickness (feet)	Depth (feet)
Fine light yellow sand	2	13
Dark yellow sand	2	15
Light yellow sand	3	18
Hard dark yellow sand	1	19
White sand	1	20
Dark yellow sand	1	21
Yellow rock		22
No water sample collected.		
April 23, 1936.		

## Well 50

Flat, on side of county road, Ed Odem tract, Jesus Gomez Survey, 3½ miles south of Southerland Springs.		
Dark sandy loam	1	1
Yellow clay	1	2
Brown sandy clay	4	6
Red sand	1	7
Fine brown sand	1	8
Yellow sand	1	9
Fine white sand	2	11
Fine red sand	2	13
Fine white sand	3	16
Chocolate-colored sand	1	17
Yellow sand	1	18
Yellow sand and gravel	5	23
Hard rock		23
No water sample collected.		
April 17, 1936.		

## Well 58

Flat, south of center north line of sec. 38, H. & T. C. R.R. Co. Survey, 6 miles north of Southerland Springs.		
Leached sand	3	3
Red and yellow clay	1	3½
Water level, 2.1 feet below top of ground, 1 hour after hole completed.		
Water sample collected.		
May 21, 1936.		

## Well 59

Hilltop, west corner of Geo. D. Bihil tract, H. & T. C. R.R. Co. Survey, 6½ miles north of Southerland Springs.		
Leached sand	5	5
Red and yellow clay and sand	½	5½
Hard red sand and clay	5	11

No water sample collected.

May 19, 1936.

## Well 60

Hilltop, north corner of John F. McCamy 160 acre tract, sec. 25, H. & T. C. R.R. Co. Survey, 6½ miles north of Southerland Springs.

Light yellow and gray sand	9	34
Fine orange sand	20	54
Yellow sand rock	1	55
Orange sand	3	58
Orange rock	1	59
Blue and black sand	3	62

Struck water at 56 feet.

Water level, 54 feet below top of ground, 48 hours after hole completed.

Water sample collected.

July 28, 1936

## Logs of test wells in Wilson County--Continued

## Well 280

Ridge top, on side of city street near Chas. McDaniel tract,  $\frac{1}{2}$  mile southeast of Floresville Courthouse.

	Thickness (feet)	Depth (feet)
Red clay	7	7
Coarse yellow sand	10	17
Coarse white sand	4	21
Soapstone	3	24
Coarse yellow sand	2	26
Red clay	4	30
Red sand	2	32
Soapstone	5	37
Coarse yellow sand	4	41
Yellow clay	6	47
Coarse white sand	3	50
Coarse yellow sand	3	53
Coarse white sand	3	56
Coarse yellow sand	1	57
White sand	4	61

No water sample collected.  
Sept. 11, 1936.

## Well 281

Valley flat, on side of city street,  $\frac{3}{4}$  miles southeast of Floresville Courthouse.

	Thickness (feet)	Depth (feet)
Red sand	1	1
Black sandy loam	5	6
Brownish-red sandy clay	2	8
Black gumbo	2	10
Red clay	4	14
Red sandy clay	1	15
Yellow sandy loam	1	16
Pink sandy loam	1	17
White sandy clay	2	19
Orange sandy clay	1	20

No water sample collected.  
Sept. 21, 1936.

## Well 282

Edge of valley flat, on side of city street,  $\frac{3}{4}$  mile southeast of Floresville Courthouse.

	Thickness (feet)	Depth (feet)
Dark sandy loam	2	2
Brown clay	2	4
Red sandy clay	4	8
Orange sand	2	10
Yellow sand	8	18
Blue clay and sand	3	21
Yellow sandy clay	7	28
White sand	1	29
Red sand rock	1	30
Gray sand	1	31
Brown sand rock	1	32
Yellow sand	2	34
Hard red sand rock	1	35

No water sample collected.  
Sept. 18, 1936.

## Well 283

Rolling slope, Pfeil Lumber Co. tract,  $\frac{1}{2}$  mile southeast of Floresville.

	Thickness (feet)	Depth (feet)
Red sandy clay	1	1
Brown sand and gravel	1	2
Gray sand rock	1	3
Yellow sand rock	1	4
Caliche and clay	3	7
Fine white sand	1	8
Gray sandy clay	2	10
Blue shale	1	11
Light yellow sand rock	2	13
Fine orange sand	4	17
Fine gray sand	1	18
Fine orange sand	1	19
Fine gray sand	4	23
Fine orange sand	1	24
Fine white sand	20	44
Gray water sand	4	48
Blue shale	11	59
Dark sand	5	64

No water sample collected.

Sept. 14, 1936.

## Well 284

Valley, Farmers Gin tract, in Floresville

	Thickness (feet)	Depth (feet)
Brown sandy loam	1	1
Black sandy loam	1	2
Black gumbo	2	4
Red sandy clay	6	10
Red clay	6	16
Yellow sandy clay	5	21
Yellow sand	2	23
Yellow and white sand	3	26
Brown clay	1	27
Gray quicksand	6	33

Struck water at 27 feet.

No water sample collected.

July 13, 1936.

## Well 285

Valley flat, A. W. Franklin tract, 1 block south of Floresville Courthouse.

	Thickness (feet)	Depth (feet)
Dark sandy loam	2	2
Stiff black gumbo	1	3
Brown clay	1	4
Brown sandy clay	3	7
Brown clay	1	8
Yellow sandy clay	2	10
Hard red rock	1	11
White clay	2	13
Yellow sand	2	15
Yellow sandy clay	3	18
Purple clay	1	19
Soapstone	10	29

Struck water at 15 and 28 feet. Water level 13.5 feet below top of ground, 48 hours after hole completed. Water sample collected. July 24, 1936.

Logs of test wells in Wilson County--Continued

Well 287

Side of city street, west part of Floresville.

	Thickness (feet)	Depth (feet)
Red sandy clay - - - - -	1	1
Light red sandy loam - -	3	4
Orange sand rock - - - -	1	5
Light yellow sand- - - -	5	10
